Please contact the IRTG beforehand and explain in detail about the involvement of the student in the experimental procedure and detailed information about the experiment itself. Use the templates, that can be found on our website.

This list is not exhaustive/complete: Please contact the respective (IRTG) coordinator to find out whether you can obtain ECTS points for a specific course/event.

The ECTS points can be achieved either within your core area or outside of it. A certificate of attendance needs to be handed in to the coordinator of your program, if you took part in an external course.

For IRTG internal events, signing attendance lists will be used.

At the end of every semester, every doctoral candidate receives an updated transcript of records from the (IRTG) coordinator.

140 ECTS points are awarded for research work (regular TAC meetings!) including the dissertation (20 ECTS points)

10 ECTS points for the oral defence

180 ECTS in total
